The above *fac-simile* of the International Stamp Album although reduced to one-quarter the size, gives a fair idea of the appearance of this new album. The pictures illustrating the designs of every series, make the inserting of the stamps in their proper places so plain, that the youngest child can not possibly make a mistake. It contains a space for every stamp including some series which have been announced, but not yet issued, such as Finland, Phillippine Islands &c., ample space for new issues, and is printed, even the cheap editions, on the heaviest paper.

### THE COATS OF ARMS OF THE WORLD.

(RUSSIA.)

Uncolored fac simile showing size.

This magnificent chart contains accurate representations of the armorial bearings of the nations of the world, all of which are beautifully and correctly emblazoned in gold and silver, and their true colors.

As a sheet for framing, it is an acquisition to any drawing room, and is indispensable in the library or study.

As a guide to determine the nationality of foreign coins or postage stamps, (most of which bear the issuing countries' arms), it will be found of great service. While cut up and inserted in stamp albums, they will be found to add much to the appearance of the page.

Printed on fine heavy paper for framing, or on the same quality of thin paper for inserting in albums. Price, 50c.

### THE MERCHANT FLAGS OF THE WORLD.

AUSTRIAN-ITALY.

BRAZIL.

FINLAND.

Uncolored fac-similes, showing size and style.

"These brilliant colored Flags faithfully represent the emblems of the different nations of the earth, and as such are a great acquisition to any Album, while the exceedingly low price (25 cents) at which they are published, places them within the reach of all."

"This Chart containing many Flags never before published, has been collected with great care, and can be relied upon as being strictly accurate, and by its aid the nationality of any ship may be easily determined, as it gives the Flag of the NATION instead of the gorgeous piece of bunting which simply belongs to one family, and is seldom, if ever, seen out of their country."

"These sheets possess three great advantages (to the Collector) over any other we are acquainted with, which consist in the facts that there is only one Flag to each country: more nations represented than have heretofore been given, and only Flags of those countries which issue postage stamps. These we consider of great importance to those who buy them to put in albums, as they can use them all instead of having to throw away half the purchase. The colors are very brilliant, and withal correct, and being printed on very thin paper, the book is not swelled to an inordinate thickness."

Beautifully and correctly printed in FIVE colors on fine heavy paper for framing, or thin paper for albums.  
Price only 25 cents.

# P R E F A C E .

In preparing the Centennial edition of THOMPSON'S COIN CHART MANUAL for publication, I have deemed it advisable to adopt the shape in which it was originally published, forty-one years ago, as being more convenient for reference. Some of the old silver coins, which have entirely gone out of use, have been expunged from its pages, while their places have been filled by fine engravings of modern coins. The values attached to the various coins figured in the manual, are taken from the statement of the Director of the U. S. Mint, the values being given in gold. In regard to silver coins, the rapid decline in value of that metal makes the nominal price greater than the intrinsic value ; for instance, a French five franc piece is quoted at 98 cents, but to realize this price it must be exported to France, as its silver value for melting is only 87 cents, with silver quoted at 49 pence per oz. in London.

The relative value of gold to silver has been gradually advancing, as will be seen by the annexed table .

It is the intention of the publishers to issue a new edition semi-annually, carefully revised, and in order to make it as complete and authentic as practicable, I shall thankfully receive any suggestion or correction which may be offered. I shall be specially obliged to brokers and others who may favor me with specimens of *newly issued* foreign gold or silver coins, for which a small percentage over their market value will be cheerfully paid.

Many brokers may not be aware that the following U. S. coins, on account of their scarcity, command a considerable premium, varying according to their state of preservation. Our publishers will always pay from 25 to 500 per cent. over the face value for those contained in the following list :

- DOLLARS. 1794, 1804, 1838, 1839, 1851, 1852.
- HALF DOLLARS. 1794, 1796, 1797, 1815

# The Coinage of the World;

## ANCIENT AND MODERN.

This work is intended to give correct information on a subject of which no educated person can afford to be ignorant; and yet, till the publication of this volume, it has been impossible to obtain a general knowledge of the *Coinage of the World* without reading through dozens of heavy quartos, at great loss of time and probably heavy expense.

By the aid of this book, any one can at once determine the nationality of any coin they may possess, and much interesting information concerning the cause which led to its issue. It is well filled with beautifully executed representative coins of every people, age and country, many of which have never been engraved before, and is the only comprehensive book on the subject ever published. The paper, press-work and binding are all of the very best. No library can be complete without it.

PRICE—CLOTH, \$2.50. HALF BOUND, \$3.50.

For sale by all booksellers, or will be sent post free, on receipt of price, by the publishers,

## AMERICAN & FOREIGN COPPER COINS.

This catalogue gives the selling price of the various series of coins of which it treats, the text being profusely illustrated with engravings of the rarer pieces, to enable the collector to determine their nationality and date of issue. The value of the American coins is given in three degrees of preservation, which will be found a valuable feature of the work.

It will be found of great value to all NEWSDEALERS and STOREKEEPERS, as it gives the fictitious value of all American copper. By its means many small traders have made hundreds of dollars by selling coins taken in their stores, which they would otherwise have passed out in change. Price 25 cents, post free.

## AMERICAN & FOREIGN SILVER COINS.

This handy manual is gotten up in the same style as the Copper coin catalogue, and is illustrated with well-executed engravings, of every American silver coin ever issued, and some of the most interesting foreign ones

Our remarks concerning the value of the Copper coin catalogue, will apply with still greater force to this, for as the silver coin which has been hoarded up for the last fifteen years, comes again into circulation, many rare and valuable pieces are sure to reward those, who take the time to look at the dates, before paying them away. It must not be thought that it is only the old pieces that are valuable, as, for instance, the publisher will pay \$5.00 for the silver dollar of 1854, and so with other comparatively recent dates.

Price 25 cents, post free. Or the two bound in one volume, with a supplement containing fac-similes, of a number of old Roman and Greek coins. Price 50 cents, post free,
